

This map illustrates the central Pacific region, focusing on the area between 131.2°W and 129.6°W longitude and 20.2°N and 21.6°S latitude. It displays the locations and expected trajectories of storms for the year 1995. Red 'x' marks denote the specific locations of storms, while blue arrows indicate the direction and path of the expected trajectories. The trajectories generally show a movement from the northwest towards the southeast, with some branching and looping patterns, particularly in the central and eastern parts of the map.
